Roll for English

An Adventure Game to Make Learning Fun

Preparing the Game

Print all the pages after this one on US Letter (8.5” x 11”) paper. This includes:

- Instructions for Play.
- Four different occupation cards. (🏹 🛡️ 💥 ⚕️)
- Four long range weapon cards. (🏹)
- Four shield cards. (🛡️)
- Four offensive spell cards. (💥)
- Four healing spell cards. (⚕️)
- One or more maps.

For best results, use a color printer to print the materials.

If desired, laminate the map for durability and for making notations with dry erase markers.

Cut all the cards apart along their outlines. Place each card in a trading card sleeve if desired. The standard 2.5” x 3.5” sleeve will work best.

Gather additional materials needed for game play:

- Two six-sided (D6) dice, one for the party and one for the teacher’s aid game master.
- A poker chip, coin, or similar item to mark the party’s location on the map.

Use one of the included maps, or use the blank map to fill in your own lesson objectives. There are 42 path spaces on the map that can be used.

Instructions for Play

Gather into groups of four students. This will be your adventure party. One teacher's assistant will join each group to serve as the game master.

Each student in the party chooses an occupation card. (🏹 🛡️ 💥 ⚕️)

The teacher's assistant shuffles the the item / spell cards and places three of each type near the corresponding special spaces. (🏹 by the *Bowsmith,* 🛡️ by the *Armourer,* ⚕️ by the *Church,* and 💥 by the *Wizard Tower.*) The remaining four cards are placed by the *Ancient Ruins.*

All members of the party start at the *Inn* space on the map. Use a coin, poker chip, or other marker to show the location of the party.

Students in the party move forward along the path, one space at a time, and take turns saying the word on the space. Once a word is said correctly, it becomes part of the party's arsenal.

The teacher's assistant will provide assistance with pronunciation and encourage using various forms of the word (e.g. verb conjugation, singular / plural, past / present / future.)

When a special space is encountered (*Armory, Church, Wizard Tower, Ancient Ruins*), the party pauses. The member of the party with the matching occupation draws a card off the top.

Students in the party proceed until the *Dragon's Lair* is reached. Once there, the students use their item / ability cards together with the words in their arsenal to attack the dragon. The teacher's assistant uses a die roll to attack in return using the dragon's flame attack.

Play ends when either the dragon or the party is defeated.

Rules of Combat

To keep the focus of he game on learning, the rules of combat are greatly simplified compared to similar adventure games.

The opening round of attack is always: *ranger, wizard, dragon.*

Players use words in their arsenal¿together with cards they have collected. A die roll is to determine how effective the attacks are.

The dragon always attacks with a die roll for flame damage.

After the dragon attacks, the warrior may use a shield to deflect some of the dragon's damage.

The cleric is then given a chance to cast a healing spell at the end of the round.

After damages are calculated, points are subtracted from the party members' health and the dragon's health. Combat continues while the dragon is still alive.

Additional rounds are similar to the opening round, with ranger and wizard attacking, then the dragon attacking, then the warrior shielding, and finally, the cleric healing.

It is the responsibility of a good game master to focus the dragon's attacks on the players with the most remaining health points so no one player is knocked out of the game too quickly. In other words, don't be a jerk and barbecue the wizard straight away.

The game master is also given flexibility when determining the dragon's health points. Make the party work for the victory, but let them win. Remember, the goal is to learn English!

Sample Game

Four students (the party) and one teacher's assistant (game master) gather around the game board of verbs. The teacher's assistant sets up the game's special space cards (Bowsmith, Armourer, Church, Wizard Tower, and Ancient Ruins) while the students choose their character occupations.

The party distributes cards for a ranger, a warrior, a wizard, and a cleric.

The party's position marker is placed at *The Inn.* This is where play begins.

A student in the party moves the position marker to the next space, the verb, *Be*. The students in the party practice saying and using the word *be* and its other forms: *am,* and *is.* When finished, the word *Be* is written in the party's arsenal.

The party moves to the next path space. Students practice using the verb *Do.* The word *Do* is added to the party's arsenal.

The party continues along the path, saying and collecting words for their arsenal.

When the party reaches the *Get* space next to the *Bowsmith,* the party pauses while the ranger in the party draws a weapon card from the top of the deck. The ranger saves this card to use when fighting the dragon.

The party continues. When the party reaches the *Armourer*, the warrior takes a shield card from the top of the deck. Similarly, the cleric takes a card when the party reaches the C*hurch,* and the wizard take a card when the party reaches the *Wizard's Tower.*

The party continues moving along the path, taking turns saying and collecting words.

Sample Game, Continued

When the party reaches the *Ancient Ruins,* a card is drawn off the top and given to whichever party member has the matching occupation. If a healing spell is drawn, it it given to the wizard. Similarly, a shield card would be given to the warrior.

The party continues collecting words on the path until the *Dragon's Lair* is reached.

The ranger has a *Crossbow* card. Following the instructions on the *Crossbow* card, the ranger chooses a word from the party's arsenal. After using the word in a sentence, the ranger rolls the die to get a four.

The game master subtracts four from the dragon's health and the word is crossed out on the party's arsenal list.

The wizard is next. The wizard chooses a word from the arsenal and uses it in a sentence. With the *Ice Storm* card, the wizard rolls a three.

The game master subtracts three from the dragon's health.

The dragon attacks next. The teacher's assistant (as the dragon) chooses to attack the party's wizard. The teacher's assistant rolls a five.

The warrior is next and steps up to use a bronze shield card. A word is chosen from the party's arsenal, then the warrior rolls to determine how much damage is deflected. The warrior rolls a three.

The warrior's shield roll (3) is subtracted from the dragon's attack (5). The two points remaining are subtracted from the wizard's health.

Sample Game, Continued

The party's cleric is next and has a *Healing Touch* card. This card can be used to heal one person and the cleric chooses to heal the wizard.

The cleric chooses a word from the arsenal and uses it in a sentence to cast the spell. The die is rolled to determine effectiveness and comes up as a six.

The wizard is down two health points, and six is more than enough to restore full health to the wizzard.

Combat resumes with the party's Ranger taking a second turn against the dragon. After using a word from the arsenal in a sentence, the ranger rolls a two.

The game master (teacher's assistant) subtracts two more health points from the dragon.

The game master chooses the cleric for the dragon's next flame attack and rolls a five. The cleric is down five health points.

The warrior uses the *Bronze Shield* and rolls a one. This blocks part of the dragon's attack and the cleric looses only four hit points.

The cleric uses a word from the arsenal to cast a *Healing Touch* spell and rolls a three. This restores most of their own health points. The cleric is now down one health point.

Play returns to the ranger. A six is rolled. The wizard is next and rolls a five.

The game master determines there is enough damage to slay the dragon and the party wins!

Cleric

Health: 8

Able to channel divine power to heal party members and with some spells, smite enemies at the same time.

⚕️

Cleric

Health: 8

Able to channel divine power to heal party members and with some spells smite enemies at the same time.

⚕️

Ranger

Health: 10

Stealthy fighters who are masters of swift attacks with bows and swords.

🏹

Ranger

Health: 10

Stealthy fighters who are masters of swift attacks with bows and swords.

🏹

Warrior

Health: 12

Strong, resilient frontline fighters able to use shields to protect themselves and party members.

🛡️

Warrior

Health: 12

Strong, resilient frontline fighters able to use shields to protect themselves and party members.

🛡️

Wizard

Health: 6

Masters of magic, able to use offensive spells against enemies, but vulnerable to injury when attacked.

💥

Wizard

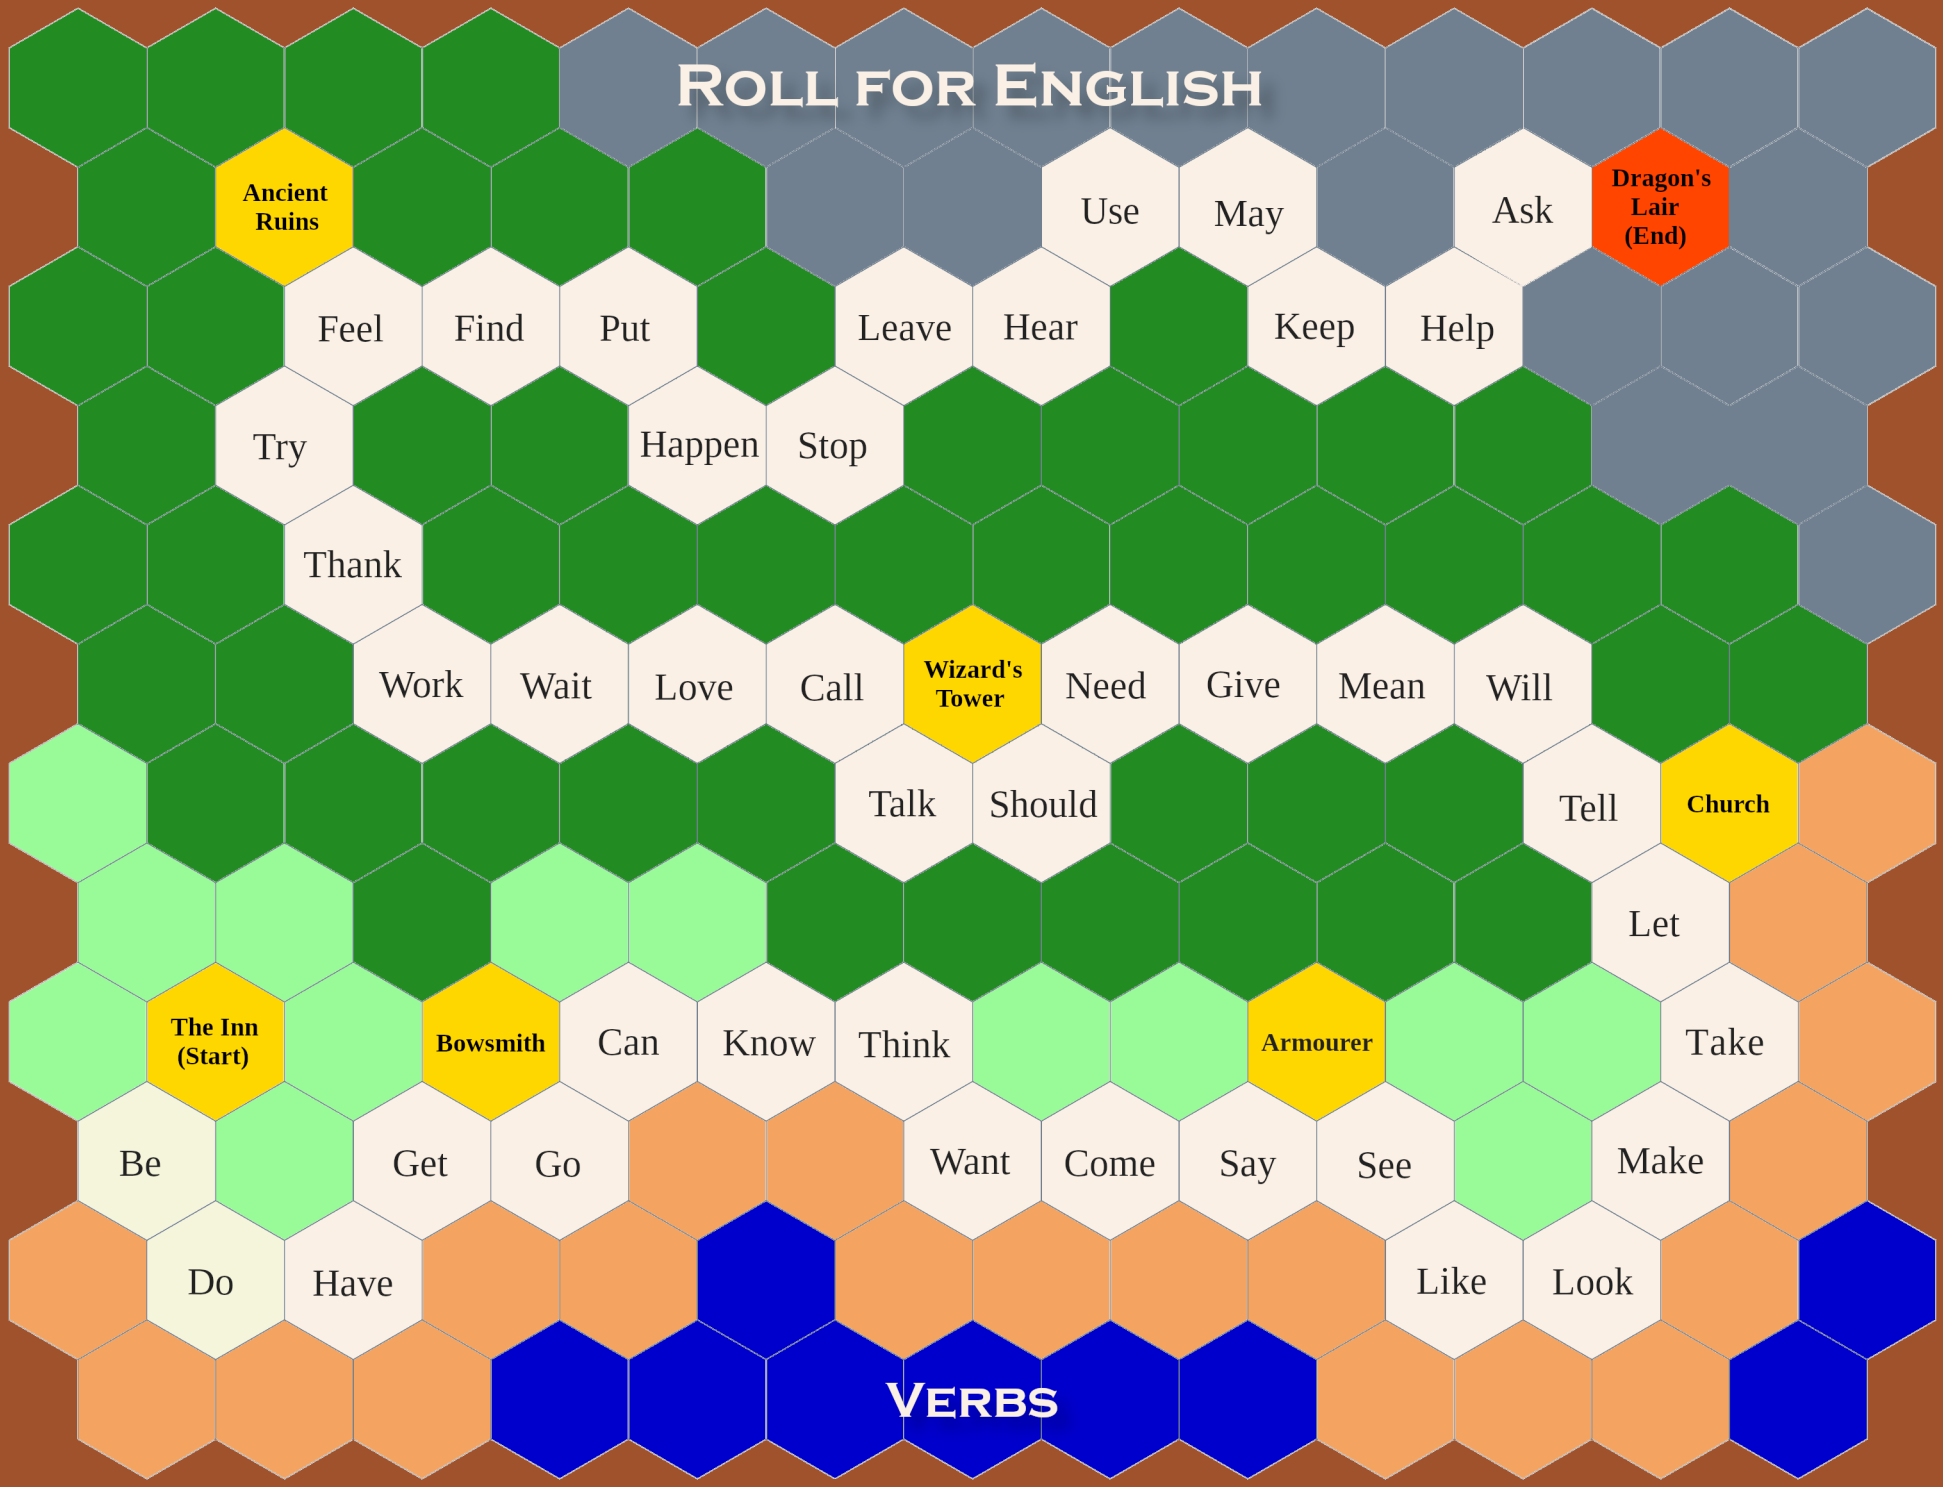

Health: 6

Masters of magic, able to use offensive spells against enemies, but vulnerable to injury when attacked.

💥

Crossbow Shoot an arrow by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to the enemy. 	**Recurve Bow** Shoot an arrow by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to the enemy. 	**Longbow** Shoot an arrow by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to the enemy. 	**Flatbow** Shoot an arrow by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to the enemy. 
Adamantine Shield Block an attack by using a word from your arsenal in a sentence. Roll the die to see how much damage is deflected. 	**Bronze Shield** Block an attack by using a word from your arsenal in a sentence. Roll the die to see how much damage is deflected. 	**Elven Steel Shield** Block an attack by using a word from your arsenal in a sentence. Roll the die to see how much damage is deflected. 	**Iron Shield** Block an attack by using a word from your arsenal in a sentence. Roll the die to see how much damage is deflected. 

Frostbite Cast this spell by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to enemy. 	**Ice Storm** Cast this spell by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to enemy. 	**Lightning Bolt** Cast this spell by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to enemy. 	**Whirlwind** Cast this spell by using a word from your arsenal in a sentence. Roll the die to determine damage dealt to enemy. 
Divine Intervention Cast this spell by using a word from your arsenal in a sentence. Roll the die and heal **all** party members by that amount. 	**Healing Touch** Cast this spell by using a word from your arsenal in a sentence. Roll the die and heal **one** party member by that amount. 	**Medicinal Healing** Cast this spell by using a word from your arsenal in a sentence. Roll the die and heal **one** party member by that amount. 	**Spare the Dying** Cast this spell by using a word from your arsenal in a sentence. Roll the die and heal **all** party members by that amount.
